## PROFILE

---

Fresh graduate in Informatics Engineering with a strong focus on web and mobile application development. Experienced in building responsive web applications and cross-platform mobile apps using modern technologies such as React, Next.js, React Native, Node.js, and REST APIs. Passionate about creating clean, scalable, and user-friendly digital products. Known as a fast learner, problem solver, and detail-oriented developer who enjoys turning ideas into functional applications.

## EDUCATION

---

**Universitas Muhammadiyah Purwokerto**  
Bachelor of Informatics Engineering  
Cumulative GPA: 3.66/4.0

Purwokerto, Indonesia  
Sept, 2021 - Dec, 2025

## EXPERIENCE

---

**PT BIT Indonesia | Full Stack Developer**

Purwokerto, Indonesia  
Oct, 2025 - Dec, 2025

- Developed "GOTANI", a cross-platform mobile POS application for agricultural distribution using React Native and Expo, streamlining sales workflows for local vendors
- Architected a real-time NoSQL database using Firebase Cloud Firestore, ensuring seamless data synchronization for inventory and transaction records.
- Implemented secure user authentication via Firebase Auth, managing role-based access control for different user types.
- Leveraged Expo's development suite to accelerate the build-and-deploy cycle, ensuring a responsive UI/UX across both Android and iOS platforms.

## CERTIFICATION

---

- BNSP Certified Programmer** – National competency certification in software development and professional programming standards issued by the Indonesian Professional Certification Authority (July 2025).
- Google AI Professional Certificate** – Mastered practical skills in Generative AI, Prompt Engineering, and the development of AI-powered applications (May 2026).
- HubSpot CMS for Developers II** – Advanced certification in theme architecture, performance optimization, accessibility standards, and SEO best practices (May 2026).
- micro1 Certified Full-Stack Developer** – Successfully passed AI-driven technical assessments evaluating expertise in frontend, backend, and API engineering (May 2026).
